HOW TO EDIT · BREAKDOWN 02 · TEASER

The teaser. One shot, four cards.

A 15 second announcement made from one continuous shot of moving fabric and four type cards. No people, no clinic, just mood and a date. Use this format when a client has something coming and nothing to show yet.

CLIENT	Dr. Katherine Ahn · Aviara Aesthetic, Beverly Hills
VIDEO	Extra Video #2: Aviara Aesthetic Story (Video 2 of 13)
FORMAT	9:16 vertical · 2160×3840 · 29.97 fps
RUNTIME	0:15
MADE FOR	Pre-launch teaser for the Beverly Hills location

15s	1	4	0
total runtime	continuous background shot	type cards	people on screen

WHAT TO STEAL

Why it works with nothing to show

The fabric does the job of the footage: it moves, it feels soft, it feels expensive.

Texture instead of footage

One slow-moving fabric plate carries the whole video. It matches the **curtain end card** we use on every Aviara video.

Mix serif and script

Clean serif for the information, **handwritten script** for the emotional word: "Beverly Hills", "Fall".

One idea per card

Each card says one thing. Place, brand, promise, date. Never stack two ideas on one card.

No hard cuts

Cards fade and write on over the same background. A hard cut would break the calm.

THE STRUCTURE

Place, brand, promise, date

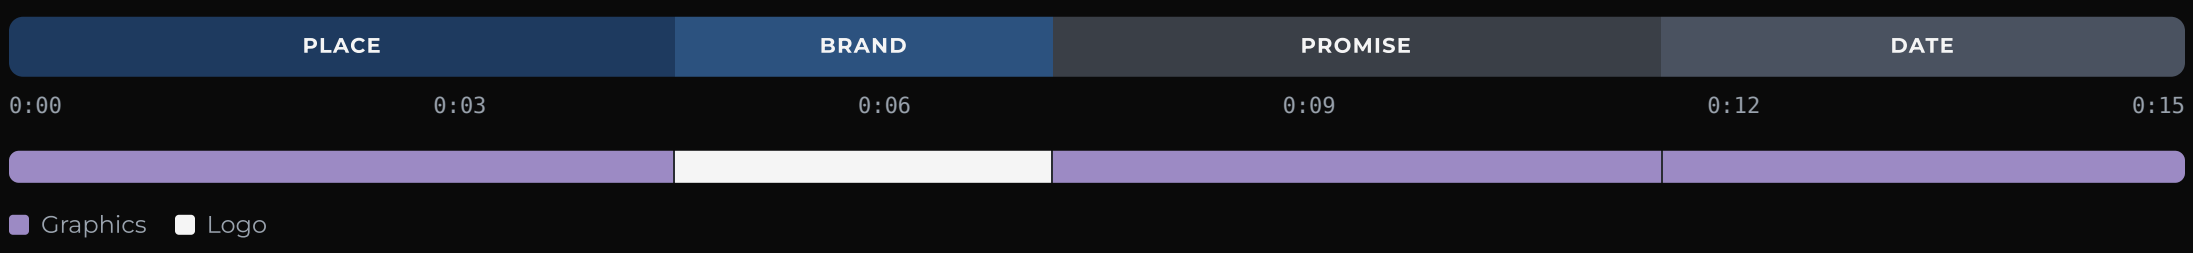

Four cards, each about 3.5 seconds.

Place
0:00–0:05
Something special is coming to Beverly Hills.

Brand
0:05–0:07
The Aviara logo, alone.

Promise
0:07–0:11
Beauty, wellness and innovation.

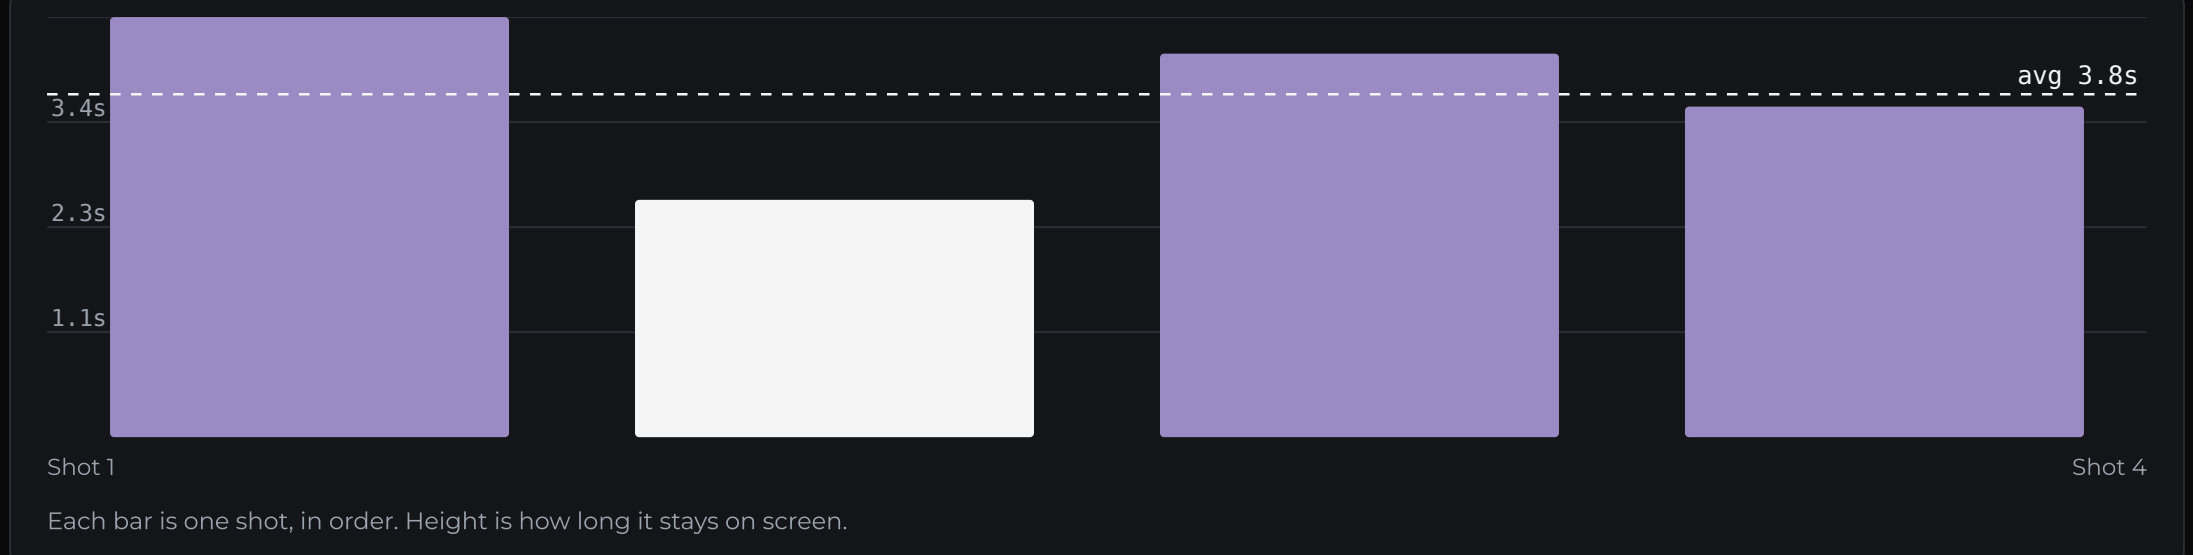

Date
0:11–0:15
Coming Fall 2026.

PACE

Card length, not cut length

There are no cuts. Each bar below is how long a type card holds.

Each bar is one shot, in order. Height is how long it stays on screen.

4
shots in 0:15

3.8s
average shot (median 4.2s)

2.6s
fastest: shot 2

4.6s
longest hold: shot 1

- Every card gets 2.5 to 4.6 seconds. Enough to read twice.
- Cards change on the music's beat, roughly every 2.3 seconds.

SHOT BY SHOT

4 type cards over one shot

The background never cuts. Each clip below is one type card.

01 0:00.0–0:04.6 · 4.6s

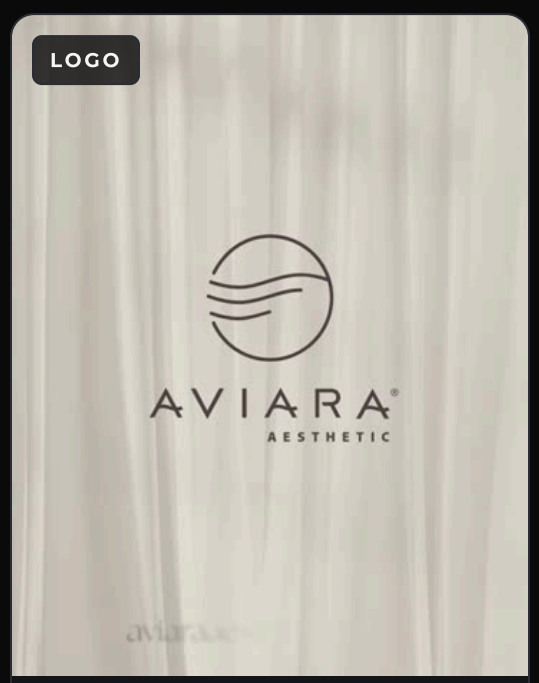

Card 1: Beverly Hills

"Something special is coming to Beverly Hills"

CAMERA
Locked frame of flowing cream fabric, moving slowly.

EDIT
Serif headline with "Beverly Hills" in a handwritten script, written on stroke by stroke.

WHY IT WORKS
The script word feels personal, like a signature.

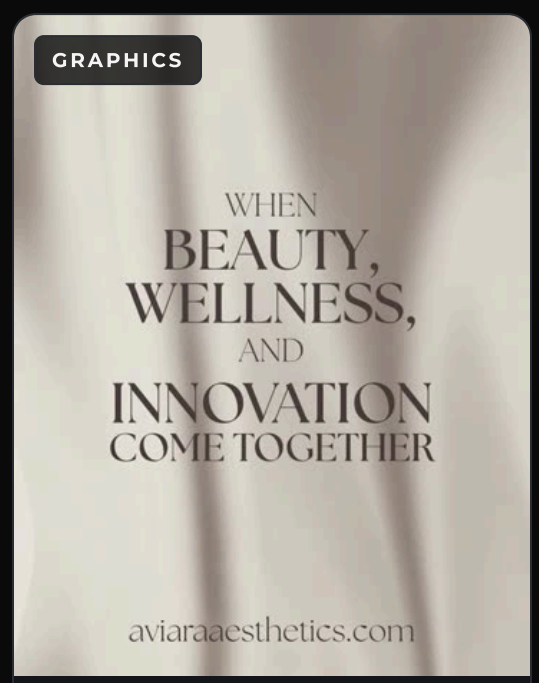

02 0:04.6–0:07.2 · 2.6s

Card 2: the logo

CAMERA
Same fabric, still moving.

EDIT
Aviara logo fades in and out, small and centered.

WHY IT WORKS
The brand gets its own card with nothing else on it.

03 0:07.2–0:11.4 · 4.2s

Card 3: the promise

"When beauty, wellness, and innovation come together"

CAMERA
Fabric continues.

EDIT
Stacked serif lines with small connector words, website URL locks at the bottom.

WHY IT WORKS
The URL stays put from here on, so viewers can find it any time.

04 0:11.4–0:15.0 · 3.6s

Card 4: the date

"Coming Fall 2026"

CAMERA
Fabric continues to the end.

EDIT
"Fall" in large script between small serif lines, "2026" in big serif.

WHY IT WORKS
Ends on the one thing to remember: when.

COLOR GRADE

Cream on cream

Almost no contrast and almost no color. The whole frame lives in a narrow band of warm taupe.

Warm fabric

Whole video

Brightness		0.76
Warmth		0.06
Saturation		0.08

- Keep the fabric in the upper mids: no true black, no pure white.
- Warm, slightly desaturated taupe.
- Text color is pulled from the darkest fabric fold.

MUSIC CHOICE

Steady, bright, on the beat

The track is the only thing moving with energy, so it has to be steady.

136 BPM
estimated tempo of the mix

0/3
cuts land within 2 frames of a beat (about 38% would by chance)

- The strongest hits land about every 2.3 seconds, which is the rhythm the cards change on.
- Pick a track with a clear, even pulse and no lyrics, so it does not fight the words on screen.

SOUND ENGINEERING

Loud and flat

-9.7 LUFS
integrated loudness (social platforms play back around -14)

+0.6 dBTP
true peak (over 0, it will clip; limit to -1)

1.1 LU
loudness range (low means tightly compressed)

Gold line: loudness every half second. Faint blue lines: every cut.

- This one is mixed hot, around -10 LUFS, with almost no dynamic range. Platforms will turn it down. Mix to -14 instead and keep the peaks under -1 dBTP.
- There is no voice, so the music can sit at full level the whole way.

DRONE, TRANSITIONS, FLICKERS

Every transition

No drone, no flickers. Only slow dissolves and one write-on.

0:01.0	WRITE-ON	"Beverly Hills" script writes on stroke by stroke.
0:04.6	DISSOLVE	Script fades out as the logo fades up.
0:07.2	DISSOLVE	Logo out, promise lines in, URL locks at the bottom.
0:11.4	DISSOLVE	Promise out, date card in.

CAPTIONS AND TYPOGRAPHY

Serif plus script

- **Serif** (all caps, tight) for the information lines.
- **Script** for one emotional word per card, much larger than the serif.
- Small lowercase connector words ("is coming to", "and") sit between the big lines.
- Color: warm taupe text on cream fabric. No white text, no shadows.

SOMETHING SPECIAL *Beverly Hills* COME TOGETHER *Fall* 2026

BEFORE YOU EXPORT

Editor checklist

Run your edit through this list before you post it for review. Checks stay on this device only.

- [ ] **One background plate**, slow motion, no cuts
- [ ] **One idea per card**, 2.5 to 4.5 seconds each
- [ ] **Script word** for emotion, serif for information
- [ ] **URL** locked in place once it appears
- [ ] **Dissolves** only, no hard cuts
- [ ] **Loudness:** about -14 LUFS, true peak under -1 dBTP
